

Carmen Fong first began providing in-home Applied Behavior Analysis (ABA) services to children with autism and their families in 2012 (Vancouver, British Columbia, Canada). From the beginning, she has been passionate about teaching children and helping them grow. It was while working with her first client, that she saw what a difference using ABA and Fluency Based Instruction could do to change how successful children can learn and how important data can guide successful intervention. As she gained more experience, her interest in ABA grew and she moved to the role as Program Manager for several teams. She also decided to pursue further education in the field of ABA. Carmen has experience with a variety of teaching methodologies including Fluency Based Instruction, Direct Instruction, Verbal Behavior, Natural Environment Teaching, and Discrete Trial Training. She has worked with other behavior analysts and agencies to implement Precision Teaching, Fluency Based Instruction, use cumulative based measures to improve instructional, and conduct higher quality staff training modules and workshops using Behavior Skills Training.

Carmen is a Board Certified Behavior Analyst and currently holds a License in Behavior Analysis in the state of Washington. She received a Master's Degree in Education specializing in Autism and Applied Behavior Analysis at Endicott College (Beverly, MA, USA) in 2017. She has experience with children with autism up to age 12 and especially enjoys developing early language skills, play skills, and early adaptive skills. She has worked on in-home therapy and consultation with schools. She maintains her credentials and continues her education of ABA by attending conferences and workshops. She also maintains memberships with the Association for Behavior Analysis International and the Standard Celeration Society.

Carmen relocated to Bellevue, Washington in early 2020 to begin working with Accelerate Learning Specialists International as a Behavior Analyst. She enjoys challenging herself at the gym, experimenting in the kitchen, and learning modern calligraphy.
